# COMPANY PROFILE

CENSUS
IT Security Works

CENSUS is an independent, privately funded company dedicated to providing highly specialized and professional IT security services.

CENSUS was founded in November 2008 by computer security experts with distinguished credentials and extensive prior experience. Since then the company has provided specialized IT security services to both public and private organizations across the globe, including Fortune 500 companies and financial institutions. Its services are characterized by technical excellence and high quality deliverables, and are geared towards supporting the complex security needs of those that define the Digital Now.

## SERVICES

The services provided by CENSUS are different from the traditional approach to IT security. CENSUS invests heavily in IT Security Research, as it recognizes that information security threats are constantly evolving.

Through research that advances the state-of-the-art, CENSUS gains unique insights into new attack vectors and techniques. This security intelligence information shapes the provided services, essentially protecting clients from future threats to their infrastructure and products.

CENSUS offers the following IT security services:

- Security Testing
- Source Code Auditing
- Vulnerability Research
- Security Training
- Security Consulting

These services have been designed with the following goals in mind:

- to identify new security risks in technologies and infrastructure
- to investigate in-depth security incidents
- to enable businesses to offer higher quality services and products

- to protect business continuity
- to educate on current threats and countermeasures
- to ensure ROI on IT Security investments

## ACHIEVEMENTS

CENSUS has helped shape the Secure Software Development Lifecycle of major corporations around the world. Many of its findings have made it into public advisories, some of them related to technologies that support today's Internet, such as the FreeBSD, Linux, Debian and Oracle WebCenter projects. Furthermore, each year CENSUS experts present novel research at industry-leading conferences, such as Black Hat, DEF CON, INFILTRATE, ZeroNights, OWASP AppSec and Hack-In-The-Box.
